**Client: Long Beach City School  
District (Owner) Collins +  
Scoville Architects (Client)**

**Location: Long Beach, NY**

**Services: Educational programming,  
Technology Consultation**

#### Relevant Facts

- 4,600 students
- Pre-Kindergarten School
- Four grade K-5 elementary schools
- One grade 6-8 middle school
- One grade 9-12 high school

The Educational Program Document will include:

- The district's vision and mission statement,
- Documentation of current teaching and learning trends and their impact on school design and learning space layout,
- Definition of Districts desired learning environments,
- Educational analysis of each school to include both space and program adequacy as well as suitability
- Documentation of community involvement,
- Definition of the District's desired educational perimeters such as grade organization, school size, and class size
- Consideration of full day Kindergarten
- Consideration of an Early Childhood Center
- Definition of curriculum initiatives and desired educational program direction
- Identification of critical issues and challenges facing the District
- A statement of technology integration into the educational program including a vision technology utilization
- Program space utilization within each school

The Facilities Technology Implementation Plan will:

- Define desired future utilization of technology
- Define technology's impact on school and learning space design
- Provide facilities and technology infrastructure guidelines and standards to architects designing new and modernized schools.

**Goal:** Create flexible **"Instructionally High Performance"** Teaching & Learning environments that efficiently meet today's Mission & Educational Program and provide growth to meet tomorrow's Vision.
