- **Single-gender Upper school**
- **34,000 SF renovation**
- **New Student Life Center**
- **Intercom integrates fully with telephone system**

Educational Systems Planning (ESP) recently provided technology planning and IT design services for Ursuline Academy in Wilmington, Delaware. Ursuline Academy is a private Catholic school that provides education to elementary school-aged boys and girls, as well as middle and high school-aged girls. Ursuline Academy is undergoing renovations and additions to their Wilmington campus, including a complete renovation and addition to transform its Convent into a Student Life Center.

ESP also provided instructional technology planning assistance to determine the Schools desired integration of technology in teaching and learning, and assisted the architect in technology's impact on learning space layout. ESP recently completed design of voice, data, and AV presentation systems in the new Student Life Center and renovations to the Upper School. This included design work on IT facilities, structured cabling, LAN electronics, telephone equipment, video distribution, master clock and intercom systems. In addition, ESP designed security systems such as intrusion detection, access control, and CCTV surveillance systems. The school opened in 2019.
